

Haizea - Feature #4

Generate HTML version of manual with a different LaTeX-to-HTML converter

08/07/2009 05:53 AM - PhoenixForge Admin

Status:	New	Start date:	08/07/2009
Priority:	Normal	Due date:	
Assignee:	Borja Sotomayor	% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	Wishlist	Spent time:	0.00 hour
Description			
The HTML version of the manual is currently generated using Latex2HTML, which is an ok converter but hasn't been maintained for ages. Thus, the HTML it generates is pretty sloppy by current standards. One promising converter to look into is Hevea: http://pauillac.inria.fr/~maranget/hevea/

- Target version changed from 1.0 to Wishlist

Not really a blocker for 1.0, since LaTeX2HTML, painful as it may be, still manages to get the job done.
